

Cavity Monitoring System V400

➤ Revolutionizing the surveying of underground cavities

➤ Hardware

- Faster data acquisition
- Improved leveling precision
- Fully redesigned electronics and packaging
- Robust, improved cabling connections

➤ Software

- Real-time visualization
- Unified software workflow: collect, visualize and process in one interface
- Merged controller and post-processing
- Laptop-based programming, control and processing
- Universally accepted data formats

**NOW
10 TIMES FASTER!**

CMS

is the ideal scanning solution for dangerous and inaccessible cavities.
